SUMMARY

Skilled in building scalable web and cross-platform mobile applications using Full Stack and React Native. Passionate about clean code, modern development, and continuously improving technical & problem-solving skills.

EXPERIENCE (React Native App Developer)

SockThack Agency — Nov 2025 – Jun 2026

Developed cross-platform mobile applications using React Native, Expo, REST APIs, Firebase Auth, and AsyncStorage while building responsive and reusable UI components.
Collaborated with team members using Git & GitHub, fixed bugs, and optimized app performance for a better user experience.

Skills & Tools: React.js, Next.js, React Native, Expo, Tailwind CSS, DaisyUI, NativeWind, React Navigation, Expo Router, Node.js, Express.js, MongoDB, Firebase, JavaScript, TypeScript, JWT, Stripe
Git, GitHub, Figma, Postman, Android Studio, VS Code, Netlify, Vercel, Firebase Auth, AsyncStorage

PROJECTS:

Dine Five – Food Ordering Mobile App —

[GitHub](#) | [APK](#)

A React Native food ordering mobile application built with Expo and TypeScript, featuring restaurant discovery, food browsing, cart management, user authentication, and location-based restaurant listing.

Features:

- Developed a cross-platform food ordering app using React Native, Expo Router, and TypeScript.
- Implemented authentication, restaurant search, cart management, and category-based food browsing
- Integrated location services, Zustand state management, AsyncStorage, and Stripe payment system.

Tech Stack: React Native, Expo, TypeScript, NativeWind, Zustand, AsyncStorage, Expo Location, Stripe,

Bhojon – Online Food Ordering & Delivery Platform

[Live](#) | [Client](#) | [Server](#)

A **full-stack food ordering and delivery web application** that allows users to browse menus, place orders, and manage food services efficiently. Includes separate dashboards for **Admin**, **Deliverymen**, and **Users**.

Features :

- Role-based authentication using **Firebase & JWT**
- Users can browse restaurants, order food, and view order history
- Deliverymen can view and update delivery status in real-time
- Admin dashboard to manage users, restaurants, and orders

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase Auth, Tailwind CSS, DaisyUI

Cholo Ride Sharing Platform (Team Project)

[Live](#) | [Client](#) | [Server](#)

Role: Full Stack Developer (Team: Quantum Coders)

Developed a web-based ride-sharing platform connecting drivers and riders with separate dashboards for users, drivers, and moderators to manage rides and communication efficiently.

- Built the **Message Template System** for the Moderator Dashboard, enabling quick and consistent communication using predefined templates with dynamic variables.
- Designed and implemented a **responsive user interface** using Tailwind CSS for a smooth experience across all devices.

EDUCATION:

Diploma in Computer Science Engineering
Aptouch Polytechnic Institute, Dinajpur | 2020 – 2024

LANGUAGE:

Bangla (native)
English (comfortable)
